

IN THE CLAIMS

Kindly amend Claim 1 to recite as follows:

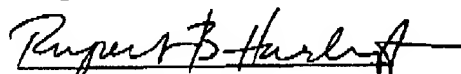

- D3
1. A film suitable for packaging comprising a homogeneous single site catalyzed copolymer of ethylene and an alpha-olefin having from three to ten carbon atoms, said single site catalyzed copolymer having long chain branching, wherein said film is a multilayer film and is heat shrinkable.

REMARKS

The above amendments to Applicants' specification, and the amendment of Claim 1, are made in response to a request from the Examiner, with the understanding that the specification amendments filed 25 May 2001 are not being entered because they refer to page and line number of the originally-filed specification, rather than the page and line number of the substitute specification filed March 2, 2001. Applicants contend that the amendments include no new matter.

If the Examiner has any questions or otherwise needs to discuss any matter related to this application, the Examiner is invited to call the undersigned at the telephone number provided below.

Respectfully submitted,

Rupert B. Hurley Jr.
